Subject Index

A

Access to health services, and impact of cost on morbidity in hypertensive population, 374
Accidents, motor vehicle traffic, among Native Americans, 112
Adolescents
  AIDS risk behaviors in, 416
  pregnancy in, 47
Age, and routine mammography screening, 55
Agency for Toxic Substances and Disease Registry, 188
AIDS
  and changing patterns of mortality, 454
  in communities of color, 461
  cumulative incidence and altered pneumonia mortality, 450
  risk behavior in minority youths, 416
  shifts in medical student beliefs on, after comprehensive training experience, 172
AIDS prevention
  sexual self-defense versus liaison dangereuse in, 146
  survey of physicians' knowledge and prevention capabilities in, 141
  validity of Comprehensive Prevention Knowledge and Applications Survey instrument in, 136
Alameda County study, psychosocial factors in physical activity in, 12
American Cancer Society, guidelines on mammography, 55
American Indians. *See* Native Americans
American Journal of Preventive Medicine
  article review policy, 53
  resignation of editor, 131a
  staff change at, 126
Analytic variability, in cholesterol measurements in worksite cholesterol screen program, 406
Anthropometry, lack of correspondence among measures identifying obesity, 107
Antismoking efforts, comparison of between U.S. and Taipei City, Taiwan, 161
Apolipoprotines, effect of coffee on, 391
Aspirin, randomized trial of, in U.S. physicians, 150
Attitude
  demographic, psychosocial, and medical correlates of pap testing, 219
  of patient and relation between smoking cessation and coronary artery disease, 131
  and patient expectations of family physician in health promotion, 33
  and patients' perspective of smoking-intervention programs directed by physician, 95
  in personal health behavior change, 89
  shifts in medical student, about AIDS after comprehensive training process, 172
  of smokers, and interest in quitting, 18

B

Behavior modification
  effects of co-worker prompts on frequency of breast self-examination, 9
  survey on smoking patterns, attitudes and interests in quitting, 18
Beta-carotene, randomized trial of, in U.S. physicians, 150
Biochemical markers, in community-based screening for chronic health conditions, 117
Biologic variability, in cholesterol measurements in worksite cholesterol screen program, 406
Blacks, AIDS in, 461
Book Reviews
  At-Risk Adolescent. (Adolescent Medicine: State of the Art Reviews), 129
  Conception to Birth: Epidemiology of Prenatal Development, 129
  Drugs and the Athlete, 333
  Exercise Adherence: Its Impact on Public Health, 66
  Guide to Clinical Preventive Services: An Assessment of the Effectiveness of the 169 Interventions, 65
  Happy Feet, 464
  Health Promotion Indicators and Actions, 130
  High Altitude Medicine and Physiology, 67
  Improving the Health of Older People: A World View, 333
  Pathways to Health: The Role of Social Factors, 65
  Textbook of Family Practices, 254
Breast cancer
  appropriateness of mammography for women age 40–49, 55
  prevention and control of, 1, 9
Breast cancer screening
  effects of co-worker prompts on frequency of, 9
  reasons for regular mammograms, 69
Breastfeed, prediction of early infant feeding experiences with women intending to, 101
Breast self-examination, effects of co-worker prompts on frequency of, 9

C

Calcium, link between osteoporosis and, 379
Cancer. *See also* Breast cancer; Cervical cancer
  risk reduction counseling for, 244
Cancer control
  appropriateness of mammography for women age 40–49, 55
  breast self-examination, 9
  clinical breast examination, 1
  regular mammograms in, 69
  screening for colorectal cancer in primary care clinic, 75
Cardiovascular disease
  educational resources for risk reduction in, 82
  inverse relation between physical fitness and, 237
Centers for Disease Prevention (CDP)
  and Agency for Toxic Substances and Disease Registry, 188
  and development of Epi Info, 178
  and National Infant Mortality Surveillance project, 227
Cervical cancer
  demographic, psychosocial and medical correlates of pap testing, 219
  increasing women's compliance with opportunistic screening for, 285
  relationship between smoking and, 208
Cesarean section, birthweight specific infant mortality risk in, 227
Chemical wastes, health effects of disposal sites, 352
Chest pain, and screening for coronary artery disease, 255
Children, impact of war on health of, 253
Cholesterol
  effect of coffee on, 391
  evaluation of referral completion after workplace screening program, 335
  patterns of physicians' treatments for referral patients from public screening for, 273
  prevalence of hypercholesterolemia in worksite screening, 280
  public screening for, 268
  reflotron performance in community screening for, 397
  in screening for coronary heart disease, 263
  variability of measurements of, in worksite screening program for, 406
Chronic health conditions, guidelines for community-based screening for, 117
Cigarette smoking. *See* Smoking
Coffee, effect of, on cholesterol and apolipoproteins, 391
Communicable diseases. *See* Hepatitis B
Community health
  attitude of smokers and interests in quitting, 18
  educational resources for cardiovascular risk reduction, 82
Compliance
  and creation of smoke-free hospital atmosphere, 214
  prevention of Hepatitis B transmission in Indo-Chinese refugees with immunization, 29
Comprehensive Prevention Knowledge and Applications Survey Instrument, 136, 141, 384
Computer, description of health maintenance tracking system for primary care practice, 311

Computer-assisted curriculum, for cancer risk reduction counseling, 244
Computer systems, Epi Info, 178
Condoms, and AIDS risk behaviors of minority youth, 416
Consultation, seeking of, with physician over headaches, 40
Coronary heart disease
  exercise tolerance test in screening for, 255
  impact of public cholesterol screening on detection of, 268
  and patterns of physicians' treatments for referral patients from public cholesterol screening, 273
  and patterns of physicians' treatments for referral patients from public cholesterol screening, 273
  relation between smoking cessation and, 131
  screening for risk of, in elderly, 263
Cost, impact of, on morbidity in hypertensive population, 374
Counseling
  patient expectations of family physician in health promotion, 33
  risk reduction, for cancer, 244
  for women intending to breastfeed, 101
Cross-cultural health, and preventive medicine training, 183
Cyclists, helmet use among competitive, 232

D

Demographics
  demographic, psychosocial, and medical correlates of pap testing, 219
  and physician consultation over headaches, 40
  and postneonatal deaths from infectins and injuries, 166
Diet
  changes in husbands' of participants in low-fat dietary interventions, 319
  effect of duration of intervention and locus of control on change, 341
  impact of public cholesterol screening on, 268
  and patterns of physicians' treatments for referral patients from public cholesterol screening, 273
  personal health habits and mental health in national probability sample, 425
Drowning, fatal and nonfatal accidents in, 189

E

Early detection programs. *See also* Screening
  breast self-examination in, 9
  clinical breast examination in, 1
Education. *See* Health education; Medical education
Elderly, screening for coronary heart disease in, 263
Environment, and Agency for Toxic Substances and Disease Registry, 188
Environmental change, physical fitness gains following simple, 298
Environmental issues, health effects of hazardous chemical waste disposal sites, 352
Environmental movement, and preventive medicine, 124
Epidemiological evidence, of relationship between cigarette smoking and cervical cancer, 208
Epidemiological studies, on demographic, psychosocial, and medical correlates of pap testing, 219
Epidemiology, teaching clinical, to medical students using collaborative learning model, 121
Epi Info, 178
Ethnographic research, patients' perspective of smoking-intervention programs directed by physician, 95
Exercise. *See also* Physical fitness
  physicians' promotion of, 410
  and postrace morbidity among runners, 194
Exercise tolerance test, in screening for coronary artery disease, 255
Expert Panel on Preventive Services, role of, 326

F

Factor analysis, and inverse relation between physical fitness and heart disease, 237
Family physician. *See* Physician
Family planning clinics, and adolescent pregnancy, 47
Follow-up system, for immunization clinic, 24
Food frequency records, and inverse relation between physical fitness and heart disease, 237

H

Hazardous chemical waste disposal sites, health effects of, 352
Headaches, characteristics of, as associated with physician consultation, 40
Health behavior research, role of health habit change as predicator in, 89
Health education
  and improving clinical breast examination skills, 1
  and obtaining regular mammograms, 69
  resources in for cardiovascular risk reduction, 82
Health habits
  and mental health in national probability sample, 425
  success in changing as predicator in health behavior research, 89
Health maintenance, description of computerized program for, in primary care practice, 311
Health policy
  and creation of smoke-free hospital atmosphere, 214
  preventive medicine training in, 183
Health professionals, skills of, in clinical breast examination, 1
Health promotion
  clinical breast examination in, 1
  Comprehensive Prevention Knowledge and Applications Survey Instrument, 136, 141
  dietary changes in husbands of participants in low-fat diet, 319
  effects of co-worker prompts on frequency of breast self-examination, 9
  evaluation of follow-up system in immunization clinic, 24
  of exercise by physicians, 410
  patients' expectations of family physician in, 33
  prevention of Hepatitis B transmission in immunization of Indo-Chinese refugees, 29
  sexual self-defense versus liaison dangereuse in AIDs prevention, 146
  survey results on physician knowledge and capabilities, 384
Health status
  in Garhwal, India, 63
  impact of war on children, 253
  of Native Americans, 155
Heart disease. *See* Cardiovascular disease
Helmet use, among competitive cyclists, 232
Hepatitis B, transmission of, in Indo-Chinese refugees, 29
Home care, development of paraprofessional home visiting programs for low-income mothers and infants, 204
Hospital, creation of smoke-free atmosphere in, 214
Hypercholesterolemia
  and patterns of physicians' treatments for referral patients from public cholesterol screening, 273
  prevalence of, in national worksite sample, 280
Hypertensive population, impact of cost problems on morbidity in, 374

I

Immersion injuries, fatal and nonfatal, 189
Immunization
  outpatient risk characteristics and influenza vaccination status, 199
  and transmission of Hepatitis B among Indo-Chinese refugees, 29
Immunization clinic
  evaluation of follow-up system in, 24
  and prevention of Hepatitis B in Indo-Chinese refugees, 29
Inactivity, and physical fitness gains following environmental change, 298
India, health status in Garhwal, 63
Infant mortality
  birthweight specific risk in Cesarean section, 227
  postneonatal deaths from infections and injuries, 166
Infants
  development of paraprofessional home visiting programs for low-income, 204
  predictors of early feeding experiences, 101
Infections
  postneonatal deaths from, 166
Influenza vaccination status, elimination of outpatient risk characteristics, 199
Injuries
  fatal and nonfatal immersion, 189
  postneonatal deaths from, 166
  postrace morbidity among runners, 194
  prevention of, and helmet use among competitive cyclists, 232
Intervention programs
  effect of coffee on cholesterol and apolipoproteins, 391
  effect of duration and locus of control on dietary changes, 341
  evaluation of, in control of urban outbreak of shigellosis, 292
  patients' perspectives of physician-delivered for smoking cessation, 95
Intervention study, dietary changes in husbands of participants in low-fat diet, 319

L

Labeling, and impact of public cholesterol screening on diet well being, and physician referral, 268
Lactose tolerance, and treatment of osteoporosis, 379
Latinos, AIDS in, 461
Lifestyle factors, prevalence of, in Native Americans, 155
Lifestyle questionnaire, in evaluating physical fitness gains following environmental change, 298
Locus of control, effect of, on dietary change, 341
Lung cancer, occupational exposure in, 348

M

Mammograms
  appropriateness of, for women age 40–49, 55
  reasons for getting regular, 69
Marathon runners, postrace morbidity among, 194
Medical education. *See also* Medical students
  in preventive medicine, 384
  survey of primary medicine residents on, 445
  teaching clinical epidemiology to medical students with collaborative learning model, 121
Medical Student Myopia Syndrome, 252
Medical students. *See also* Medical education
  shifts in AIDS beliefs, 172
  teaching clinical epidemiology to, with collaborative learning model, 121
Medication, access to, and morbidity in hypertensive population, 374
Mental health, personal health habits and in national probability sample, 425
Meta-analysis, of relationship between smoking and cervical cancer, 208
Mineral water, calcium rich, in lactose intolerant adults and treatment of osteoporosis, 379
Minnesota Health Program, survey on smoking patterns, attitudes and interests in quitting, 18
Minorities, AIDS risk behaviors of youth, 416
Morbidity
  impact of cost problems on, in hypertensive population, 374
  postrace, among runners, 194
Mortality. *See also Infant mortality*
  AIDS and changing patterns of, 454
  cumulative AIDS incidence and altered pneumonia, 450
  excess associated with racial and socioeconomic aspects of myocardial infarction recovery, 438
  fatal and nonfatal immersion injuries, 189
  from motor vehicle traffic accidents among Native Americans, 112
Motivation. *See* Attitude
Multifactorial determination, of physical activity, 12
Musculoskeletal problems, and postrace morbidity among runners, 194
Myocardial infarction, racial and socioeconomic aspects of, 438

N

National Infant Mortality Surveillance project, 227
Native Americans
  behavioral risk factors in, 155
  fatal motor vehicle traffic accidents among, 112
Natural history, psychosocial factors in, for physical activity, 12
Neoplasms. *See* Cancer
Nurses, clinical breast examination by, 1

O

Obesity, lack of correspondence among measures identifying, 107
Occult blood test, in screening for colorectal cancer, 75
Occupational exposure, in lung cancer, 348
Osteoporosis, link between calcium and treatment of, 379
Outreach programs, development of paraprofessional home visiting program for low-income mothers and infants, 204

P

Pap smear
  demographic, psychosocial, and medical correlates, 219
  increasing women's compliance with opportunistic cervical cancer screening, 285
Paraprofessions, development of home visiting program for low-income mothers and infants, 204
Patient
  expectations of family physician in health promotion, 33
  involvement of, in screening for colorectal cancer, 75
  knowledge of, and relation between coronary artery disease and smoking cessation, 131
  perspective of, on physician-delivered smoking cessation intervention, 95
Patient histories, physicians' knowledge of, and AIDS prevention, 141
Physical examination, clinical breast examination in, 1
Physical fitness. *See also* Exercise
  gains in, following environmental change, 298
  inverse relation between heart disease and, 237
  psychosocial factors in natural history of, 12
Physical readiness test, in evaluating physical fitness gains following environmental change, 298
Physician(s)
  clinical breast examination by, 1
  consultation with, over headaches, 40
  family, and risk reduction counseling for cancer, 244
  intervention of, and relation between coronary artery disease and smoking cessation, 131
  instruments for measuring current preventive medicine practices among primary care, 136
  patients' expectations of family, in health promotion, 33
  patients' perspective of smoking-intervention programs directed by, 95
  randomized trial of aspirin and beta-carotene in U.S., 150
  support from, and obtaining regular mammograms, 69
  survey of knowledge of family, in AIDS prevention, 141
  survey results on knowledge and application of prevention capabilities, 384
Physician Myopia Syndrome, 252
